

Issuance of a Credential with a Signer Account

1. "New Credential as Signer" Form

To create a Verifiable Credential, click the "**New credential as Signer**" button, at the top right corner of the dashboard page, which will take you to the creation form.

 or type unknown

2. Complete the "New Credential as Signer" form

Fill all the Mandatee and Mandator fields of the form, which are marked with a "*" symbol. Below, see an example of filled form.

 or type unknown

 or type unknown

3. Adding Powers to the Credential Subject

You can add different powers in the last part of the form using the combo box. **Select at least one.**

 or type unknown

4. Create Credential

Once all mandatory fields are correctly filled, the "**Create Credential**" button will become brighter, indicating that it can be clicked. Click on it.

 or type unknown

A popup will be displayed to confirm that you want to create the credential. Click "Accept" to create it. If the issuance is successful, a success message will be displayed and you will be redirected to the dashboard page.

 or type unknown

 or type unknown

5. See the Issued Credential

You will see that the Credential you just created has a status of **DRAFT**. After the user downloads it with the Wallet, it will have a status of **VALID** (you might have to refresh the page to see it change).
